Purpose

A properly conducted fair should and does result in increased production. No one factor does more to stimulate effort in the improvement in farm conditions than the county fair. It is there that the farmer has an opportunity to see and to compare his or her work with the efforts of others. Success in competing with one's neighbors stimulates the farmer to greater efforts. It is the purpose of the Haskell County Fair Board to make this fair an educational institution and to encourage cooperation among farmers and business people in the various communities of the county.

Liability of Exhibitors and General Public

In no case shall the Haskell County Fair or any of its officers be held responsible for damages in any loss, damage, injury, death or disability by disease or from theft or from any other cause to any such property or to any person at the Haskell County Fairgrounds. The management reserves the right to exclude from the grounds any person or persons whom they deem undesirable or expel from the grounds such person.

DEPARTMENT K - ROCKETRY

Superintendent: Celeste Kunselman

1. To exhibit in this division, the rocket **must** have been flown. Support rods **must not** extend past the tip of the highest nosecone on the model. **Support rods must remain in the upright position, do not angle.** No model may be submitted on a launch pad.
2. The report that accompanies the rocket must be limited to the 4-H Rocket Exhibit Information Form which is glued to a 10" x 13" envelope.
3. Plans (or photocopy of) must be placed inside the envelope. **This includes original design rockets.** If a rocket kit has been modified structurally, notations need to be given that indicate the changes made. One or more photographs of the rocket at the launch site are required. Photographs showing the rocket at the moment of ignition are preferred. Photographs should be mounted on **one** side of an 8 1/2" x 11" page.
4. For a rocket entered in the **original design** classes, one extra page of photographs may be added to show unusual construction or other important features. Described in the summary how the model was tested for stability prior to flying.
5. The altitude achieved by the model is to be determined using a **method other than estimation.** Examples of accepted methods include altimeter, computer software, range finders, etc.

General Construction Guidelines

1. Angles of fins must fall within a plus or minus 2 degree variation using an approved fin alignment guide (such as DGD 031989).
2. Exhibits must be uniformly painted, smoothly finished, and have decals applied smoothly. Fins should be rounded or streamlined. Fins and body tubes are to be sealed to eliminate the appearance of body grooves and wood grain. Any seams or plastic parts are to be sanded smooth. The rocket is to be properly assembled. Fins and launch lugs are to be filleted to reduce drag and properly secure them to the model. The nose cone is to fit snugly but still allow for easy removal.
3. Model **may not** be judged based on their paint scheme, with the exception of rockets that fit the definition of a scale model. They may be judged based on paint scheme. Under no circumstances is the weight given to the paint scheme to be sufficient enough, by itself, to move the model from one ribbon placing to another.
4. Flight damage is to be documented by the participant. The judging of flight damage is to secondary to all other aspects of the model and only then may it even be considered.
5. Beginner kits with prefabricated fin assemblies and pre-finished rockets requiring no painting are not acceptable, and will be given a participation ribbon.
6. Engines and igniter are **not** permitted with the exhibit.
7. **Original design** rockets **cannot** be a modification of a pre-existing kit and must be of original design.
8. Multi-stage rockets can be flown using just the final stage and be considered fully flown.
9. Each rocket must be able to stand freely by itself or be supported by a solid base, not to exceed 3/4" thick and 8" square.
10. Exhibitors are only allowed to exhibit 3 rockets from a kit and/or 3 rockets from original design.
